WORK EXPERIENCE

Bank of America

VP & Design Lead Feb 2023 – Present

- Designed an AI-powered error-resolution feature that surfaces likely causes and fixes when users hit failures in the ordering flow, cutting user escalation rate 10% in its first week. Introduced an AI-assisted workflow that turns post-meeting discussions into low-fidelity prototypes the same day.
- Drove design strategy and a unified design system across product lines for a 35-person platform org, shifting the team from pixel delivery to outcome ownership; cut order-submission time 40% and support tickets 20%.
- Redesigned onboarding and in-product user education, lifting service-ordering completion rate 30% and order-submit success rate 60%.
- Led a design-sprint innovation program that delivered 30% faster and produced 15+ validated product directions adopted across BofA enterprise banking.

Assistant VP & UX Designer Dec 2020 – Feb 2023

- Led the redesign of BofA's private cloud ordering and migration process; reached 80% post-launch user satisfaction and grew the platform from 202 to 1,000+ hosted applications in two years.
- Architected Figma design system with component library — adopted across 12+ product teams as the org-wide design standard.
- Identified and championed Glassbox as the team's behavioral analytics solution, working directly with the Glassbox team to tailor session tracking and reporting to BofA's internal cloud platform — leveraging deep banking domain knowledge to configure what mattered. Became the team's Glassbox reporting owner, translating behavioral data into product insights delivered to PM for roadmap decisions.

UX Designer Jun 2018 – Dec 2020

- Redesigned a task-management mobile platform, raising NPS from 5 to 36; grew the user base 200%+ in the first quarter post-relaunch.

PROJECTS

OneCo (Mar 2026) — Solo Project, Builder-archetype quiz in 4 languages

[Next.js](#) · [TypeScript](#) · [Vercel](#) · [Tailwind](#) · [EN](#) / [ZH](#) / [ES](#) / [FR](#)

- Built a one-person-company personality quiz as a growth funnel for Jobpilot, leveraging influencers to reach their audiences (my target users) and driving a 200% lift in Jobpilot landings in one week.

Jobpilot (Mar 2026) — Solo Project, AI-powered job coaching copilot

[Next.js](#) · [TypeScript](#) · [Tailwind](#) · [Claude API](#) · [Vercel](#)

- Pivoted the product from job-hunting to job-coaching after market research and user interviews revealed the deeper need: shipped customized resume revision, AI-driven market positioning analysis, a behavior-and-experience story bank, and an application tracker that auto-surfaces sorted JD context when an interview lands.

PawpawStory (Dec 2025) — Solo Project, AI voice storytelling for kids and parents, iOS app, live on the App Store

[React Native](#) · [ElevenLabs API](#) · [Claude API](#) · [Figma MCP](#) · [Cursor](#) · [Gemini](#) · [Vercel](#)

- Owned 0 → 1 build and launch as sole developer, then ran usability testing and login flow tests; used drop-off and bounce-rate data to identify friction points and refine features for a smoother experience, holds a 4.8-star App Store rating.

EDUCATION

University of California, San Diego

B.S. Cognitive Science – Design & Interaction · 2018
